10 DAY AVENTURE TO THE PACIFIC OCEAN

9 NIGHTS ON A LIVEBOARD

18 DIVES EXPLORING REVILLAGIGEDO

A LIFETIME OF MEMORIES

Introduction

The **Revillagigedo Archipelago**, better known as “Socorro Islands”, is a group of four volcanic islands located about 250 nautical miles south of Cabo San Lucas, in Baja California, a southwestern state of Mexico.

These islands are **only accessible via liveaboard**. The complete isolation of this archipelago in the middle of the Pacific has favored the concentration of **great marine life** that has made it one of the must-see diving destinations on the entire planet, only comparable to the Galapagos or Cocos Island, due to its encounters with pelagic fish.

You can see **giant mantas** in many places around the world. But nowhere else boasts a population of giant mantas that literally seek out interaction with divers. While mantas are the main reason to voyage out to Socorro, there are lots of other animals to see, including **schooling hammerheads** and silky sharks, plus 12 other species of sharks, occasionally **bottlenose dolphins** that hang out with divers at certain dive sites.

Liveaboard “ROCIO DEL MAR”

Day 1 (November 1st, Friday)

5pm check in at port San José del Cabo. Once on board, there will be a security and boat briefing, crew introduction and cabin assignment, before we navigate to San Benedicto overnight (It takes approximately 26-28 hours one-way to reach the islands).

Day 2-9 (December 2nd till 9th)

The 2nd day we will be still navigating towards the remote Revillagigedo Archipelago. Once there, we will have a routine of between 3 or 4 daily dives, we will dive at the islands of San Benedicto, Socorro and Roca Partida. All our dives will be done from pangas (mexican word for dinghy). We will finish the trip with another long navigation heading back to San José del Cabo.

Day 10 (December 10th, Sunday)

Breakfast, 8am check out and transfer to Los Cabos Int'l Airport (SJD) or to your hotel of choice.

DIVING

We will dive for 6 days non-stop - mythical places like El Cañón, El Boiler, Cabo Pierce and Roca Partida.

If the weather conditions allow, there will be 4 daily dives, except for the day we have to register at the Isla Socorro Naval Base.

The use of Nitrox is highly recommended! Let's keep in mind that these are dives with an average depth of between 20 and 30 meters. If you need assistance during panga entry or exit inform our crew. They are happy to help!

After the last dive of the trip we will clean our equipment and begin our navigation back to San José del Cabo.

A large shark is swimming in the ocean, with a smaller shark swimming above it. The scene is set in deep blue water, and the sharks are the central focus of the image.
